

VIT BHOPAL UNIVERSITY
SMART INDIA HACKATHON -2026
INTERNAL HACKATHON - 2026
ASSESSMENT METRICS AND RUBRICS

Score	General interpretation
5 – Excellent	Outstanding; comprehensive, highly relevant, well justified, and clearly demonstrated
4 – Very Good	Strong; minor gaps but meets the criterion very well
3 – Good	Adequate; criterion is reasonably addressed but has noticeable gaps
2 – Fair	Partially addressed; significant weaknesses or insufficient justification
1 – Poor	Very weak, unclear, or largely fails to address the criterion

No.	Criterion	5 – Excellent	4 – Very Good	3 – Good	2 – Fair	1 – Poor
1	Problem Understanding & Relevance to Theme	Problem is exceptionally well defined; strong understanding of root cause, target users and SIH theme; highly relevant	Problem is clearly defined and highly relevant with minor gaps	Problem is reasonably defined and relevant	Problem definition is incomplete or relevance is weak	Problem is unclear and/or not relevant to the theme
2	Innovativeness & Uniqueness of the Idea	Highly novel, creative and distinctive solution; clear differentiation from existing solutions	Strong innovation with identifiable differentiation	Some innovative elements but largely based on existing approaches	Limited innovation; significant similarity to existing solutions	Little/no innovation or uniqueness demonstrated
3	Technical Feasibility & Implementation Approach	Technically robust, realistic and implementable; architecture, methodology and implementation plan are very clear	Technically feasible with a strong implementation approach and minor gaps	Feasible in principle but implementation details are incomplete	Significant technical limitations or unclear implementation approach	Technically impractical or implementation approach is absent
4	Business / Social Impact & Usefulness	Demonstrates substantial measurable impact; clearly identifies beneficiaries, use cases and tangible benefits	Strong potential impact and usefulness with clear beneficiaries	Reasonable usefulness and potential impact	Limited or insufficiently demonstrated impact	Impact/usefulness is unclear or insignificant
5	Scalability & Sustainability of the Solution	Highly scalable and sustainable; clearly addresses deployment, resources, maintenance and long-term viability	Good scalability and sustainability with minor gaps	Reasonable scalability but sustainability aspects need strengthening	Significant scalability/sustainability concerns	Not scalable or sustainable; no convincing strategy
6	Technology Stack Justification	Technology choices are highly appropriate, clearly justified and directly	Technology choices are appropriate and adequately justified	Appropriate technologies identified but	Technology choices are partially appropriate or poorly justified	Technology stack is inappropriate, unclear or unjustified

No.	Criterion	5 – Excellent	4 – Very Good	3 – Good	2 – Fair	1 – Poor
		support the solution objectives		justification is limited		
7	Clarity of Presentation & Documentation	Exceptionally clear, concise, professional and logically structured; excellent visuals/documentation	Clear and professional with minor presentation/documentation issues	Understandable but has some clarity/structure issues	Difficult to follow; considerable documentation/presentation gaps	Poorly structured, unclear or incomplete
8	Evidence, Validation & Expected Outcomes	Strong evidence/prototype/results clearly demonstrate the feasibility of the proposed solution; expected outcomes are specific, measurable and convincingly supported	Good evidence or prototype with clearly stated expected outcomes; minor gaps in validation	Some evidence/prototype or validation is presented; outcomes are reasonably defined	Limited evidence/validation; expected outcomes are vague or insufficiently supported	No meaningful evidence, validation or clearly defined expected outcomes
